

FACT SHEET: YOU ARE A CLOSE CONTACT OF A PERSON WHO TESTED POSITIVE FOR COVID-19

Last revised: December 22, 2020

COVID-19 is spread through close contact with an infected person. Simcoe Muskoka District Health Unit (SMDHU) uses [contact tracing](#) as an effective tool to slow and control the spread of COVID-19. SMDHU staff follow up with individuals who have tested positive for COVID-19. The information that is gathered helps us to understand where a person may have been exposed to the virus, how the virus is spreading in the community, who the virus is affecting, and how it can be contained.

If you have been identified as a close contact, you may be informed either:

- 1) directly by public health, or
- 2) by someone in your life who has tested positive and has been asked by public health to inform you that you are a close contact

You are required to take the following steps to stop the spread of COVID-19:

- Stay home and [self-isolate](#) for 14 days after your last contact with the person who tested positive for COVID-19.
- Only leave the house to get tested. It is recommended you seek testing 5-7 days from your last exposure to the case. For testing centre locations visit our [website](#).
- Monitor yourself for [symptoms](#) of COVID-19.
- If you do get tested you must still self-isolate while you wait for your results. **Even if your test result is negative you must continue to self-isolate for the full 14 days.**

WHAT IS A CLOSE CONTACT?

A close contact is anyone in your household or anyone outside of your household that you have had close contact (within 2 metres) with for at least 15 minutes in total (e.g. at one time, or through smaller interactions adding up to 15 minutes), when either you or the other person was not wearing a mask or face covering.

HOW TO SELF-ISOLATE:

- Stay home.
- Avoid contact with others- keep your distance by at least 2 meters (6 feet).
- Wash your hands.
- Cover your coughs and sneezes.
- If you cannot maintain a 2 meter (6 feet) distance from others wear a mask over your nose and mouth when around others.
- For more detailed information on to self-isolate safely see [Public Health Ontario's Self-Isolation Fact Sheet](#).

WHAT IF I DEVELOP SYMPTOMS OF COVID-19 WHILE I AM SELF-ISOLATING?

- Stay home and self-isolate for 10 days after your symptoms started.
- Only leave the house to get tested. For testing centre locations visit our [website](#). **NOTE: this means you may be tested twice. Once when you were identified as a close contact and didn't have symptoms, and again when you developed symptoms.**
- Contact the Simcoe Muskoka District Health Unit at 1-877-721-7520 ext. 5829 to let them know you are experiencing symptoms.
- After 10 days, you can stop isolating if you no longer have a fever and symptoms are improving for at least 24 hours, but you should continue with physical distancing measures. If you are still unwell at 10 days, contact Telehealth or your health care provider.
