When COVID-19 Symptoms Develop at School or Child Care

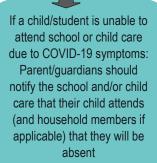

This protocol should be followed when a child/student, staff or visitor develops symptoms of COVID-19.

Last revised: March 12, 2021

At Home

Complete appropriate Provincial Screening Tool for students/children OR staff/visitors.

Follow actions listed on screening tool

If a staff or visitor is unable to attend school or child care due to COVID-19 symptoms they should notify the school or child care of their illness and planned absence. All household members will also need to stay home from school and/or child care

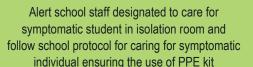

- Attendance records
- Class/cohort lists and seating charts
- Before/after school child care lists
- Transportation lists & seating charts
- Updated contact information (e.g. names, date of birth, phone number and address) for students/staff
- Special assignments/programs/activities (e.g. Special Education)
- Records of essential visitors

At School, Child Care Program or on Bus

If a child/student develops any new or worsening symptom of COVID-19 per the screening tool

Contact parent/guardian for immediate pick-up

If a school or child care staff/visitor develops any new or worsening symptom of COVID-19 per the screening tool

Symptomatic staff are to go home immediately

NOTE

Everyone in a household MUST stay home if a child/staff/visitor or anyone else has COVID-19 symptoms until one of the following occurs:

- 1. The person with symptoms is tested for COVID-19 and test results are negative; OR
- 2. An alternate diagnosis is given by a healthcare provider for the person who has symptoms.

If the person with symptoms in the household does NOT get tested, everyone else in the household MUST stay home for:

- 14 days from the last contact with the ill person if the ill person can self-isolate away from the rest of the household; or
- 24 days from start of the ill person's symptom(s) if the ill person CANNOT self-isolate away from the rest of the household.

Siblings and staff who are household members of an ill child/staff are recommended but not required to leave at the same time as the ill child/staff. They can complete their day and then will need to be excluded moving forward until one of the above criteria is met.

Caring for a Symptomatic Student at School / Child Care

- Alert school and/or child care staff designated to care for symptomatic students.
- Student is brought to the isolation room.
- If physical distancing cannot be maintained, staff caring for student uses PPE kit (gloves, masks, face shields and gown) to be put on before entering the room with the student.
- Student should be wearing a mask (unless exemption), and can be encouraged to wear medical mask if tolerated.
- Staff supervise student while maintaining physical distance, when possible.
- Follow school and/or child care protocol for PPE, cleaning and isolation room requirements.
- Siblings or other household members of the symptomatic child are recommended but not required to leave school immediately and can finish their day, however they will then need to be excluded moving forward until one of the criteria above is met.

Communication Regarding Next Steps

- Provide individual with appropriate information (e.g. appropriate student and/or staff/visitor screening tool and related protocols) and refer to www.smdhu.org for more information.
- Advise individual that any household members that currently attend/work at the school or child care need to abide by return to school/child care/work criteria.
- Advise the individual to follow the actions listed on the daily screening tool and related protocols. The required actions may differ based on the nature of the symptoms and whether it is a child/student or adult (staff/visitor) who is experiencing the symptoms.
- Encourage the individual to share the results with the school and/or child care centre as soon as possible.
- Thank the individual for taking the necessary steps to protect the school and larger community we are all doing our part!

Communication Regarding Return to School

Please refer to the following SMDHU resources for more information:

- My Child did not pass the COVID-19 daily screening. Now what? (includes: When can my child return to school or child care?)
- COVID-19 Return to School or Child care: Protocol for Employees/Visitors

Encouraging Follow through on Recommended Actions

Tel: 705-721-7520

Toll free: 1-877-721-7520

We understand that it may be challenging for schools and child care centres to monitor and enforce the actions listed in the Provincial Screening Tools for students and/or staff/visitors, and in the return to school protocols for school and child care settings.

Although medical documentation is not required to return to school, schools and/or child care centres may choose to request parents/guardians and/or staff/visitors to complete a COVID-19 Return to School and/or Child Care Attestation Form.

An Attestation Form is available for download on the SMDHU website.
