### Key messages from Dr. Gardner, Medical Officer of Health

#### **Increasing availability of walk-in vaccination appointments**

- Our community vaccination clinics continue to offer more opportunities for Simcoe Muskoka residents ages 12 years and older to walk in and receive their first or second COVID-19 vaccine dose without an appointment. **All of our mass immunization clinics are now allowing residents to walk in to receive their first vaccine dose.**
- A schedule that outlines which of our clinics are able to offer second dose walk-in appointments for the upcoming week is available on the health unit's [website](#). This schedule is posted on Mondays at noon and updated throughout the week as needed. We continue to post daily on our social media channels about any clinics that have the capacity to offer second dose walk-in appointments as well. Eligibility criteria for these walk-in appointments is as follows:
  - Walk-ins are for those who have a primary or secondary residence and/or who receive their health care in Simcoe Muskoka.
  - Those who received an mRNA vaccine (Pfizer or Moderna) for their first dose can walk in to receive their second dose at a participating clinic if it has been at least 28 days since they received their first vaccine dose.
  - Individuals who received a first dose of the AstraZeneca vaccine can walk in to receive a second dose of an mRNA vaccine if it has been 8-12 weeks since the date of their first dose.
  - Walk-in appointments will be available while supplies last.
- Residents are encouraged to come dressed for the weather as they may be required to wait outdoors for a short time before entering the clinic. We are doing our best to minimize wait times and move lines indoors when we can. If anyone is unable to wait outside, they can let our staff know and we will bring them inside to wait.

#### **Residents not yet vaccinated encouraged to step up to receive their first vaccine dose**

- While we have made great progress in vaccinating the Simcoe Muskoka population, we still have a way to go. Our goal is to get beyond the province's Step 3 target of 80% of the eligible population ages 12 and older vaccinated with one dose and 75% of those eligible fully vaccinated with two doses.
- As of July 20, 77% of eligible residents ages 12 and older have received their first dose, and 56% of those eligible have received their second dose. This leaves 23% of eligible

residents who have not received a COVID-19 vaccine dose. In particular, the health unit has found vaccination rates to be lower among youth ages 12-17 and young adults ages 18-29. In addition, men ages 18-39 years old have had lower rates of vaccination compared to women in the same age group.

- The health unit encourages those who have not yet been vaccinated to do so as soon as possible. Getting vaccinated is one of the most important actions people can take to protect themselves, their loved ones, and our community. All approved COVID-19 vaccines in Canada have been shown to be safe and are an effective way to prevent infection, serious illness, death, and the spread of COVID-19 to others. **The best vaccine is the first one offered to you.**
- Vaccination will also help us get back to the people and activities we love, such as hugging friends and family, playing on our favourite sports team, seeing a concert with a crowd of people, travelling, and going back to in-class learning. As we slowly return to pre-pandemic activities, it is the COVID-19 vaccine and our communities' immunity level that will help keep us from more restrictions.
- The health unit and our many partners continue to work hard to ensure that getting a COVID-19 vaccine in Simcoe Muskoka is accessible, convenient, and a positive experience. We have 13 mass immunization clinics operating across the region, all of which are now allowing residents to walk in and receive their first vaccine dose without an appointment. There are also over 130 pharmacies and primary care providers participating in our local vaccine rollout.
- For all these reasons, we encourage residents to get vaccinated as soon as possible with the first vaccine offered to them. *Don't wait, vaccinate!*
- For more information, please visit our new [webpage](#) devoted to the key things to know about COVID-19 vaccines.

### **Public health measures to follow under Step 3 of Ontario's reopening plan**

- As of July 16, Simcoe Muskoka, along with the rest of the province, has moved into Step 3 of Ontario's [Roadmap to Reopen](#). Under Step 3, more indoor services may reopen with restrictions in place, such as indoor dining, faith-based services, retailers, cinemas, theatres, sport and fitness facilities, museums, and other entertainment venues. Size limits for social gatherings and organized public events have also increased.
- The progression to Step 3 is a welcome move forward and the continued decline in case counts, hospitalizations, and deaths in addition to rising vaccination rates across the province gives us reason to be hopeful. While we have made great progress in bringing the COVID-19 pandemic under control, it is important to remember that the pandemic is not over. As such, the health unit is reminding residents of the importance of continuing to follow public health measures and restrictions in place to help stop the spread of COVID-19. Under Step 3 of Ontario's [Roadmap to Reopen](#), this includes:
  - Abiding by the outdoor gathering limit of 100 people and the indoor gathering limit of 25 people,
  - Maintaining a physical distance of 2 metres from those living outside of your household,
  - Wearing a mask indoors and outdoors when physical distancing is not possible as well as in all indoor public spaces,
  - Staying home and getting tested if you have symptoms of COVID-19, and,
  - Washing your hands regularly.

### **Change in HealthSTATS and the COVID-19 Case Explorer**

- As of July 20, the category that was previous titled 'recovered cases' category on our HealthSTATS webpage is now labelled as 'resolved cases'. This is in keeping with Public Health Ontario's reporting.

- ‘Resolved cases’ is a more comprehensive category that is defined as follows: includes confirmed COVID-19 cases who are not deceased and are no longer being followed by public health (e.g., 14 days past symptom onset if not hospitalized, 20 days past symptom onset if hospitalized), as well as those who are reported as ‘recovered’ (a confirmed COVID-19 case who is 14 days past symptom onset, without fever, has improving symptoms and is not currently hospitalized). The move from ‘recovered’ to ‘resolved’ results in the addition of 429 cases to this new category.

Previous media briefings are posted on the SMDHU [Facebook](#) page and [YouTube](#) channel.

<b>Simcoe Muskoka COVID-19 Case Status (As of July 21, 2021 14:00)</b>			
<b>Total Cases</b>	<b>Active Cases</b>	<b>Resolved</b>	<b>Deaths</b>
12,339	22	12,062	255

## Provincial, National and Global COVID-19 Case Status

### Ontario *(As of July 21, 2021, 10:30)*

Total cases	Active Cases	Resolved	Deaths
548,609	1,334	537,975	9,300

#### As of today:

- There were 135 new cases, 151 resolved cases, and 4 deaths in the last day.
- The total confirmed variant of concern cases in Ontario are as follows:
  - Lineage B.1.1.7 (Alpha variant): 144,922
  - Lineage B.1.351 (Beta variant): 1,474
  - Lineage P.1 (Gamma variant): 5,027
  - Lineage B.1.617.2 (Delta variant): 3,693
- A total of 139 people are hospitalized with COVID-19, 145 people are in intensive care units (ICU) due to COVID-related critical illness, and 70 people are on ventilators.
- A total of 18,479,003 vaccine doses have been administered. 69.7% of all Ontarians and 79.8% of those ages 12 and older have received their first vaccine dose. 55.2% of all Ontarians and 63.1% of those ages 12 and older have been fully vaccinated.

#### Since the last Partner Update:

- There have been 1,047 new cases, 1,156 recoveries, and 35 deaths.
- There are 144 fewer active cases compared to the same day last week.
- There are 35 fewer people hospitalized, 35 fewer people in the ICU, and 46 fewer people on ventilators compared to the same day last week.
- The 7-day average number of new daily cases is 150.

#### Regional updates:

- Areas with the highest number of active cases per 100,000 population: Grey Bruce (35.17), Porcupine (29.19), Waterloo (26.16), North Bay Parry Sound (24.23), and Hamilton (17.51).
- Areas with the highest number of active cases: Toronto (268), Grey Bruce (157), Waterloo (140), Peel (123), and Hamilton (94).

#### Weekly Epidemiological Summary highlights: July 4-10, 2021:

- During the week of July 4, there were 1,226 new cases reported, which represented a 17% decrease compared to the 1,471 cases reported the week prior.
- For the past three weeks, Grey Bruce and Region of Waterloo have reported the highest case rates in the province.
