

Respiratory Outbreak Summary Report

Outbreak Denominator Counts = the number at risk (or number of people that live or work in that area)

# of residents that live on the affected unit #1		# staff that work on the affected unit #1	
# of residents that live on the affected unit #2		# staff that work on the affected unit #2	
# of residents that live on the affected unit #3		# staff that work on the affected unit #3	
# of residents that live on the affected unit #4		# staff that work on the affected unit #4	
Total Number of residents in the facility		Total Number of staff in the facility	

Outbreak Numerator Counts = the number of people that were line listed (or number affected by outbreak)

# of residents on line list that live on unit #1		# of staff on line list that work on unit #1	
# of residents on line list that live on unit #2		# of staff on line list that work on unit #2	
# of residents on line list that live on unit #3		# of staff on line list that work on unit #3	
# of residents on line list that live on unit #4		# of staff on line list that work on unit #4	
Total # of residents in the facility line listed		Total # of staff in the facility line listed	
# of line listed residents admitted to hospital and OB related		# of line listed staff admitted to hospital and OB related	
# of line listed residents with pneumonia [CXR+]		# of line listed staff with pneumonia [CXR+]	
# of line listed residents deaths due to OB		# of line listed staff deaths due to OB	

Respiratory Outbreak Summary Report

**Complete the following section for outbreaks
due to influenza or combined influenza ONLY**

When the line list is updated daily and properly filled out, most of the required information can be found there

# of residents immunized prior to when OB was declared		# of staff immunized prior to when OB was declared	
# of residents immunized during time OB was declared		# of staff immunized during time OB was declared	
# of residents on line list immunized prior to OB		# of staff on line list immunized prior to OB	
# of residents on line list NOT immunized prior to OB		# of staff on line list NOT immunized prior to OB	
# of residents on line list immunized prior to OB & admitted to hospital for OB related cause		# of staff on line list immunized prior to OB & admitted to hospital for OB related cause	
# of residents on line list NOT immunized prior to OB & admitted to hospital for OB related cause		# of staff on line list NOT immunized prior to OB & admitted to hospital for OB related cause	
# of residents on line list with CXR pneumonia immunized prior to OB		# of staff on line list with CXR pneumonia immunized prior to OB	
# of residents on line list with CXR pneumonia NOT immunized prior to OB		# of staff on line list with CXR pneumonia NOT immunized prior to OB	
# of residents on line list with death associated with OB and immunized prior to OB		# of staff on line list with death associated with OB and immunized prior to OB	
# of residents on line list with death associated with OB and NOT immunized prior to OB		# of staff on line list with death associated with OB and NOT immunized prior to OB	

Complete the following section ONLY if Antivirals were used during outbreak

# of residents on antivirals not line listed (prophylaxis)		# of staff on antivirals not line listed (prophylaxis)	
# of residents on line list put on antivirals within 48 hours of onset of symptoms (treatment)		# of ill staff on line list put on antivirals within 48 hours of onset of symptoms (treatment)	
# on line list residents on antivirals >48 hours after onset of symptoms (treatment)		# on line list staff on antivirals >48 hours after onset of symptoms (treatment)	
How many residents developed side effects while taking Tamiflu?		How many staff developed side effects while taking Tamiflu?	
Of those residents that developed side effects, how many discontinued use of antivirals?		Of those staff that developed side effects, how many discontinued use of antivirals?
