

Rapid Antigen Testing (RAT) – Testing Guidance (e.g., Panbio, BD Veritor)

Note: RAT is not recommended for individuals with known contact with a positive COVID-19 case or for symptomatic individuals)

-  No evidence of SARS-CoV-2
-  SARS-CoV-2 detected
-  Confirmatory PCR test required

Asymptomatic Individual
Note: Frequent, repeated RAT as a screening/surveillance tool is most appropriate use case.

*** Continue to adhere to public health and infection prevention and control measures
