

Pneumococcal Immunization Recommendations for LTCHs and Retirement Homes

At age 65, everyone should receive a dose of Pneu-P-23 (this is regardless of whether they have received any previous doses of either Pneumococcal vaccines). This dose needs to be at least 8 weeks after any previous dose of Pneu-C-13 and at least 5 years after any previous dose of Pneu-P-23.

All clients over the age of 50 are recommended to receive the Pneu-C-13 vaccine, but only some clients are eligible for it publicly funded (free). See the box below for eligibility.

<https://www.canada.ca/en/public-health/services/publications/healthy-living/canadian-immunization-guide-part-4-active-vaccines/page-16-pneumococcal-vaccine.html>

- Eligibility for Publicly Funded Pneu-C-13**
- Stem Cell transplants
 - HIV infection
 - Immunosuppressive conditions, specifically
 - Asplenia
