BARRIE CONTINUES TO FACE AN OPIOID CRISIS

[^]2018 City of Barrie data only includes January - September

SUPERVISED CONSUMPTION SITES: KEY OUTCOMES

1. Prevent overdose deaths and unsafe injection practices
2. Increase access to health and social services, including addiction treatment
3. Decrease community harms and costs, including public injection and publicly-discarded needles

CONSULTATION AND ENGAGEMENT – JAN-MARCH, 2019

2,039 People completed the online survey

47 People with lived experience of drug use completed the survey with a community partner agency

24 Community stakeholders participated in consultations

Potential Benefits of a SCS in Barrie (all sources combined)

- Reducing drug use in public
- Reducing risk of injury and death from drug overdose
- Reducing the number of used needles on the streets and in parks
- Help lower risk of diseases such as HIV, Hep C
- Help increase use of new drug-related equipment for each injection
- Act as a bridge to other services and connect clients to additional supports in the community
- Creating a safe and supportive environment for a client

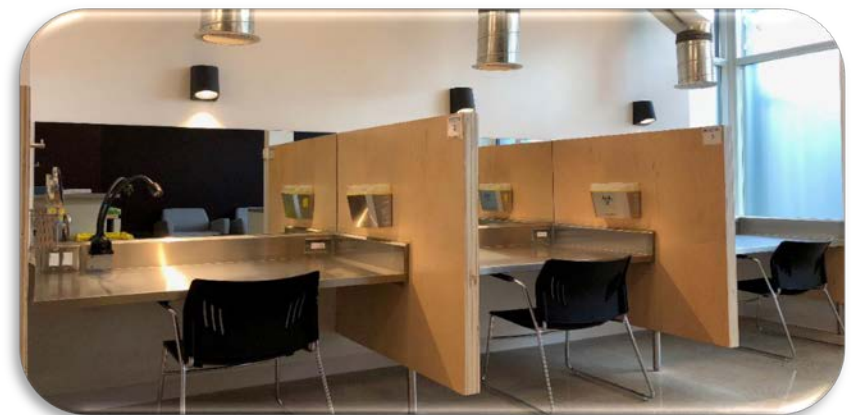

**COMMUNITY CONSULTATION AND
ENGAGEMENT FOR A SUPERVISED
CONSUMPTION SITE IN BARRIE
REPORT**
April 2019

Concerns of a SCS in Barrie (all sources combined)

- Encouraging more drug use
- More people who use drugs would be in the neighbourhood
- Safety of community members
- Potential for increase in crime and drug trafficking
- Increase in vulnerable population in the community

CONSULTATION AND ENGAGEMENT REPORT

NEIGHBOURHOOD MEETING - MAY 15, 2019

- Engagement and education were provided re: SCS location, operations and mitigation strategies
- 105 people attended
- Feedback received from participants through discussions and in writing
- Primary concerns of participants included:
 - Safety of residents in the neighboring community of the SCS, including seniors and young families
 - Safety concerns related to David Busby Centre clients will get worse with opening of SCS
- Some participants voiced support and encouraged urgent action:
 - *“The consumption site was well thought out and I feel proud to be paying taxes towards this initiative. I hope that positive results will be shared with the community so that people can understand the good it does.”*

MITIGATION STRATEGIES

1. Community and Client Safety
2. Ongoing Community Engagement
3. Public Education and Awareness
4. Site Selection
5. Access to Wrap Around Services

Other Application Components

SITE SELECTION - 90 MULCASTER ST

Key considerations:

- Client access:
 - Within 1 km radius of where drug use occurs, and walking distance of *open* drug use
 - On a bus route
- Sensitive land uses:
 - No less than 100-200m from a child care centre/park/school
- Co-location with wrap-around services
- Suitable physical space
- Consultation feedback re: location

Photo Source: Barrie CTV, April 24, 2019
