

Tetanus and Diphtheria (Td) - Td Adsorbed

The Td vaccine protects against two diseases in one needle: tetanus and diphtheria.

Who should get this vaccine? ^{1,3}

All adults should receive a booster dose of Td every 10 years.

How well does this vaccine work? ^{1,3}

When given on the recommended schedule:

- 99% of those fully vaccinated are protected against tetanus.
- 97-100% of those fully vaccinated are protected against diphtheria.

Is there an alternative to this vaccine?

At this time there are no other ways to prevent these diseases.

Hand washing and covering the mouth and nose while coughing/sneezing can help reduce the spread of disease.

Is this vaccine safe?

The risk of a serious reaction or side effect from this vaccine is much less than the risk of tetanus or diphtheria.

If you experience any side effect worse than what is listed below, please seek medical advice and notify the health unit.

Common side effects of this vaccine ^{1,3}

- Mild pain in muscle
- Redness
- Swelling

Less common:

- Headache
- Nausea
- Mild fever
- Irritability
- Drowsiness

Rare:

- Arthus-like reaction (severe pain, swelling, hard lump where needle was given, edema, haemorrhage and occasionally dead tissue).

Who should not receive this vaccine? ^{1,3}

- Anyone with an allergy to any of the vaccine components or who has had an allergic or anaphylactic reaction to this vaccine.
- Anyone who has developed Guillain Barré Syndrome (GBS) within 6 weeks of receiving tetanus containing vaccine.

What is in this vaccine? ²

Td Adsorbed	Also found in...
